

April 5, 2005, Miles Technologies, Lake Zurich, IL, a warehouse automation and system integrator since 1982, has announced a unique and comprehensive RFID Solution Suite which consists of three core components:

Miles Technologies believes that these investments will help accelerate the adoption rate of RFID technology in the markets they serve. According to Tom O'Boyle, Chief RFID Technologist at Miles "Helping customers become self sufficient with the technology is key to expansion. Our offerings achieve that goal. RFIDLabeling, is a great information source for customers; the RFID Benchmark LAB™, is a world class training facility in a realistic factory setting; and Compliance Partner vRFID nets out problematic tags and placement to meet mandates and ship with confidence! Together, they form a very powerful solution."

Details:

www.RFIDLabeling.com is a customer communication vehicle where we share successful techniques and strategies for implementing RFID technology. Here you will find step by step instructions, mandate summaries, white papers, press releases and other useful information for implementing RFID Compliance Labeling Solutions.

RFID Benchmark LAB is conveniently located near the Chicago O'Hare Airport. It is nestled in a real world factory with RF

OPEN HOUSE! April 12th and 13th!

interference challenges making all training and testing realistic. Customers can cost effectively learn RFID package and pallet label placement techniques, EPC numbering, RFID Slap and Ship software and understand RFID technology challenges and remediation techniques. The LAB will host several professional training rooms, demonstration facilities and a 70' by 40' training and test area with 28' high ceilings. The facility easily accommodates full pallet loads for personalized customer training.

Compliance Partner vRFID is a turn key labeling solution with hardware, software and science that can detect weak and improperly placed tags before they ship! The Compliance Partner also has a unique QA oriented graphical interface, automated case to pallet tag association, EPC number generation, production labeling features, audit trails and more. On www.RFIDLabeling.com you will find a matrix that compares the Compliance Partner feature set to other industry solutions.

Customers are encouraged to visit www.RFIDLabeling.com for details on this comprehensive RFID solution suite.
