WJ COMMUNICATIONS TO SPONSOR RFID JOURNAL LIVE!

SAN JOSE, CA, APRIL 7th, 2005 – WJ Communications announced today that it will sponsor the 3rd annual RFID Journal LIVE! 2005 taking place April 10-12, 2005 at the Sheraton Chicago Hotel & Towers, in Chicago, Illinois. This executive conference will feature an unparalleled speaker line-up and agenda featuring major companies at the forefront of deploying RFID systems, as well as top experts addressing the issues surrounding its deployment.

At RFID Journal LIVE!, WJ Communications will be introducing its latest multi-protocol, UHF Reader Card:™, the 1 Watt MPR7000. In addition, WJ will showcase its existing line of UHF MPR RFID Cards in PCMCIA Type II packages™, the MPR5000 and MPR6000. These devices are Type II PCMCIA compatible and operate with the EPC Class 0, EPC Class 1 and 0+ air protocols. They are also flash upgradeable to future standards, such as EPC Class 1 Gen 2. These small and easy-to-use RFID cards are building blocks for OEM's, system integrators, value-added resellers (VARs) and small business owners developing printer, handheld, fixed and other integrated RFID-enabled end-products. In addition to these devices, the WTX1000 ASIC, an integrated UHF RFID transceiver IC will be showcased, along with recently acquired products from Telenexus, the IR2130 integrated reader and antenna, and SR2200 4-port DSP-based portal reader platform. Both are multi-protocol and flash upgradeable to future standards and functionality like EPC Class 1 Gen 2.

"We are very pleased to have WJ Communications as a sponsor of RFID Journal LIVE! 2005. Attendees at the event benefit not just from hearing from end users during the program, but also from discussing the best ways to implement the technologies with vendors supporting our event," said Mark Roberti, founder and editor of *RFID Journal*.

WJ Communications has experience in the design and manufacture of large multiplexed portal readers, compact OEM modules, and miniaturized PC Card™ readers, as well as semi-passive transponders for auto toll collection and other high-value added applications. WJ Communications brings the depth and breadth gathered over nearly five decades of advanced microwave and RF design, and an unmatched reputation for reliability and quality, to RFID applications.

"We are excited to be a part of RFID Journal LIVE! 2005. The show is the ideal forum for us to meet face-to-face with end-users who are involved in RFID initiatives, as well as the industry associations, consultants, experts and thought leaders influencing RFID's adoption," said Chuck Lau, vice president and general manager of RFID for WJ Communications.

RFID Journal LIVE! is organized into five key tracks by subject, with speakers who will deliver in-depth, unbiased information covering RFID in retail, manufacturing, logistics, core technologies, and building the business case. Conference delegates will be able to:

- Learn from other organizations about the costs, stumbling blocks and benefits of RFID adoption
- Understand the business case for deploying RFID technologies
- Network with executives and business managers faced with similar RFID business, deployment and integration challenges
- See technology and product demonstrations from the leading RFID systems providers as well as the latest innovations from RFID startup companies.

About RFID Journal

RFID Journal is the only independent media company devoted solely to radio frequency identification and its many business applications. Our mission is to be the ultimate resource for businesspeople that need to understand how RFID can help their companies boost supply chain efficiencies, reduce inventories, limit theft, improve product availability and add convenience for consumers. *RFID Journal* serves the needs of businesspeople looking to take advantage of RFID technologies with timely news, strategic analysis, networking opportunities at events and in-depth education.

About WJ Communications

WJ Communications, Inc. is a leading provider of radio frequency (RF) solutions serving multiple markets targeting wireless communications, RF identification (RFID), broadband cable, and defense and homeland security. WJ addresses the RF challenges in these multiple markets with its highly reliable amplifiers, mixers, RF integrated circuits (RFICs), RFID reader modules, chipsets, and multi-chip (MCM) modules. For more information visit www.wj.com or call (408) 577-6200.
